

Population Density & Water Accessibility

Dar es Salaam, Tanzania

In total, 102123 households' access to water will be affected by flood in Dar es Salaam, which is around 8% of all households in the city

Name: Wazo
Pop Den: 1695 sqkm
Pct Flood: 53.14

Kinondoni

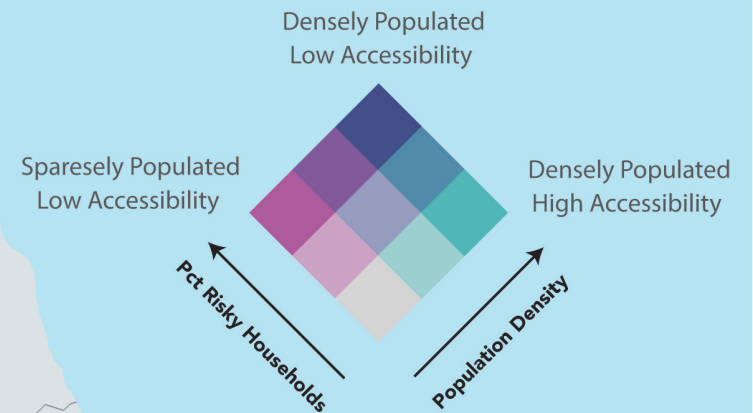

Name: Azimio
Pop Den: 31834 sqkm
Pct Flood: 0.00

Name: Tandale
Pop Den: 47283 sqkm
Pct Flood: 65.80

Ilala

Temeke

Name: Toangoma
Pop Den: 1189 sqkm
Pct Flood: 16.52

This map compares the percentage of households whose access to their nearest water amenity is affected during flood event with the population density using administrative wards as the geographic unit. It illustrates some areas of overlap between wards that are densely populated and wards with a large proportion of households whose water access is cut off because of floods. These areas should be of particular concern since high population density compounded the problem of inadequate water access.
